

检验报告单

Certificate of Analysis

|                        |                                                       |                      |             |
|------------------------|-------------------------------------------------------|----------------------|-------------|
| 产品名称<br>Product Name   | 9-硼双环[3.3.1]壬烷<br>9-Borabicyclo[3.3.1]nonane solution |                      |             |
| 批号<br>Batch No.        |                                                       | 报告编号<br>Report No.   | RFCF2311005 |
| CAS 号<br>CAS No.       | 280-64-8                                              | 批量<br>Batch Quantity | 1567.00kg   |
| 检品来源<br>Product Source | 302 车间<br>302 Workshop                                | 生产日期<br>Manu Date    | 2023.11.02  |
| 分析日期<br>Analysis Date  | 2023.11.03                                            | 报告日期<br>Report Date  | 2023.11.07  |
| 复验日期<br>Retest Date    | 2024.04                                               |                      |             |

| 项目<br>Test Items     | 质量标准<br>In-house Standard                                                                                    | 检验结果<br>Test Results     |
|----------------------|--------------------------------------------------------------------------------------------------------------|--------------------------|
| 外观<br>Appearance     | 无色至浅黄色液体<br>Colorless to pale yellow liquid                                                                  | 无色液体<br>Colorless liquid |
| 鉴别<br>Identification | 本品按浓度测定项下滴定，有气体生成<br>This product is titrated under the concentration test item, and there is gas generation | 符合规定<br>Compliance       |
| 浓度<br>Concentration  | 0.48~0.52 mol/L                                                                                              | 0.52mol/L                |

储存条件：产品在 0℃左右有明显析晶，需 15℃以上保存。  
Storage condition: The product exhibits obvious crystallization at around 0℃ and needs to be stored above 15℃.
